## Objective

**Software Engineering Graduate (Jan 2026)** with hands-on experience building full-stack web applications using **Java, JavaScript/TypeScript, React, Node.js, Spring Boot, SQL, and AWS**. Proven ability to design scalable systems, work with APIs, and ship production-ready features through academic and independent projects. Strong foundation in **data structures, algorithms, backend systems, and cloud fundamentals**. Seeking **Software Engineer / New Grad / Internship** roles.

## Education

### Western Governors University

*B.S. in Software Engineering, GPA: 3.79*

Millcreek, Utah

Nov 2023 — Jan 2026

### Lake Washington Institute of Technology

*Associates of Applied Science - Transfer, Minor in Computing and Software Development, AAS-T*

Kirkland, Washington

Jan 2021 — Jun 2023

## Projects

### GreenBite - Recipe Platform | React, Tailwind, REST APIs

- **Implemented** a responsive recipe discovery platform, increasing monthly active users by 40% and reducing recipe search latency by 50% by integrating and optimizing third-party APIs
- Implemented a **dynamic search and filtering UI component**, reducing user search time by 40% and increasing task completion rate by 25% by optimizing queries and client-side rendering
- **Optimized** front-end UX and integrated backend APIs, resulting in 45% faster page loads and 60% lower API latency, driving a 25% increase in user engagement.

### LiteMusic - Music Search & Playback App | React, Vite, Tailwind CSS, Framer Motion, Deezer API

- **Developed** a Spotify-inspired music search and playback app using React and the Deezer API.
- **Implemented** live search, audio previews, and animated UI components with Framer Motion.
- Built responsive layouts and custom light/dark themes using Tailwind CSS.

### Swap Spot - Full Stack E-Commerce Platform | React, Node.js, MongoDB, Redux

- **Architected a full-stack MERN application** with a RESTful API, implementing secure user authentication via JWT and bcrypt to protect customer data and admin routes.
- **Engineered a global state management system** using Redux and React Context to handle complex shopping cart logic, real-time stock updates, and instant UI pricing calculations.
- **Integrated third-party APIs** including PayPal for secure payment processing and Cloudinary for scalable, cloud-based image storage, deploying the final production build to Render.

## Skills

**Languages:** Java, JavaScript, TypeScript, SQL, Python, HTML5, CSS3

**Frameworks & Libraries:** React, Next.js, Node.js, Express, Spring Boot, Angular

**Databases:** MySQL, PostgreSQL, MongoDB, Firebase

**Cloud & DevOps:** AWS (EC2, S3, RDS), Docker, GitHub Actions

**Tools & Practices:** Git, REST APIs, JSON, MVC, OOP, Agile/Scrum, Unit Testing, Framer Motion, Postman, Figma

## Certifications

### AWS Cloud Practitioner

Jan 2026

*Amazon Web Services • Expires: Jan 2029*

**ITIL Foundation Certification in IT Service Management***Dec 2025**ITIL • Expires: Dec 2028*

Credential ID: GR671841538IB

**CompTIA Project+***Sept 2025**CompTIA*

Credential ID: COMP001022698766

**Google IT Support***Sept 2023**Coursera - Google*
